SUMMARY

Software Engineer with 6 months of hands-on experience building and deploying production-grade full-stack web applications using Next.js, TypeScript, Node.js, REST APIs, and AWS. Strong foundation in Data Structures, Algorithms, and Computer Science fundamentals, with experience developing scalable features, reusable components, and performance-focused solutions.

SKILLS

- **Languages:** C++, JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend:** React, Next.js, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST APIs, API Integration
- **Cloud & Deployment:** AWS, Vercel
- **Tools & Platforms:** Git, GitHub, GitLab, Linux
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Low-Level Design

EXPERIENCE

• Seaflux Technologies

Ahmedabad | On-site

Software Engineer Intern

Jan 2026 – Jul 2026

- Developed and maintained production-grade web applications using Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, and modern frontend engineering practices.
- Built and enhanced 10+ customer-facing pages and internal portal modules, contributing to feature development across the company's production platform.
- Developed 20+ reusable UI components, improving consistency, maintainability, and development efficiency across multiple application modules.
- Resolved a critical content delivery issue affecting blog and case-study updates by implementing a dynamic content retrieval architecture integrated with AWS S3, eliminating the need for full application redeployments for content changes.
- Implemented pagination for blog and case-study modules, reducing initial payload size and improving page load performance for content-heavy sections.
- Integrated REST APIs and contributed to frontend-backend workflows, enabling seamless data exchange across multiple business features.
- Participated in debugging, performance optimization, code reviews, and Agile development workflows using Git and GitLab.
- Contributed to frontend and backend feature development, gaining hands-on experience with production deployments, cloud-hosted applications, and scalable web architectures.

PROJECTS

SeaBasket — E-commerce Platform

Tech Stack: Next.js, TypeScript, Node.js, Express.js, MySQL

- Developed a full-stack e-commerce platform with authentication, product catalog, cart management, checkout workflow, order tracking, and user profile management.
- Built secure JWT-based authentication with OTP verification, password reset workflows, and email notifications.
- Developed REST APIs using Express.js, TypeORM, and MySQL for product management, reviews, ratings, filtering, and pagination.
- Implemented Redux Toolkit for state management and optimized component architecture for scalability.

PowerPlai Sports

Tech Stack: React, TypeScript, Tailwind CSS, Vercel

- Designed and developed a fully responsive sports platform from scratch using React.js and TypeScript.
- Managed complete deployment lifecycle, including production deployment on Vercel, custom domain configuration, DNS setup, and release management.

House Price Prediction

Tech Stack: Python, Pandas, Scikit-learn, Matplotlib

- Built a machine learning model to predict housing prices using regression techniques on real-world datasets.
- Performed data preprocessing, feature engineering, and model evaluation using MAE and R^2 metrics.
- Visualized trends and prediction results using Matplotlib to support data-driven insights.

ACHIEVEMENTS

- Solved **170+ Data Structures & Algorithms problems** on LeetCode, achieving a **contest rating of 1560** and demonstrating strong problem-solving and algorithmic thinking skills.

EDUCATION

• SAL Engineering And Technical Institute

Ahmedabad, India

Bachelor of Technology - Information Technology; CGPA: 8.59

Jul 2023 – Jun 2026
